

```
PolyMesh2D::Functional  
::Function< input_dim,  
            output_dim >
```

The diagram illustrates a relationship between two C++ function types. At the bottom is a white box containing the text 'PolyMesh2D::Functional::Curve< 1, 2 >'. At the top is a gray box containing the text 'PolyMesh2D::Functional::Function< input_dim, output_dim >'. Two blue arrows originate from the top of the white box and point upwards to the bottom of the gray box, indicating that the first type inherits from or is a specialization of the second.

```
PolyMesh2D::Functional  
::Curve< 1, 2 >
```
